

IMPROVEMENTS

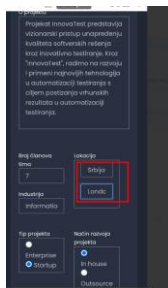

1. Field of Study (Smer) allows the input of numbers which is incorrect

Current:	In the 'Add Education' Section, the 'Field of Study (SMER)' allows the input of numbers, which is incorrect
Request:	Implement input validation, restricting entries to alphabetical with allowed special symbols relevant to academic majors
Reason:	This modification would enhance data accuracy and user experience

2) Creating a job ad/CITIES relevant to the selected country to be matched

Current:	The location dropdown menu currently allows matching between cities and countries without restrictions.
Request:	It should be modified to ensure that only cities relevant to the selected country can be matched.
Reason:	This change would prevent accidental mismatches and errors.

3) **SEND** button permits the successful submission of a filled-out form even with invalid or non-existent email addresses

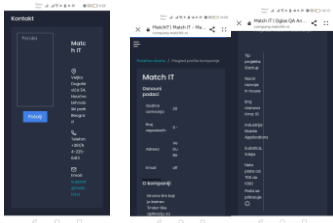

Current:	The "SEND" button on Home Page permits the successful submission of a filled-out form, even when the previous field contains email addresses that are invalid or do not exist.
Request:	Implement a system that prevents the submission of invalid or nonexistent email addresses. (Validation)
Reason:	To uphold a commitment to meticulous attention to detail and professionalism. Reinforcing the dedication to maintaining high standards

4) **RESPONSIVE DESIGN** for Korisnička podrška, Profil kompanije, Oglasi / QA ANALYST

Pozicija

Current:	Incorrect division of words into syllables, lack of hyphenation. The company name, address, phone number, and email are disorganized. screenshot attached.
Request:	Adapt the structural content to the mobile application for samsung/iphone

Reason:	Delivering a seamless, user-friendly experience
----------------	---

5) Image LOGO doesn't contain ALT ATTRIBUTE

Precondition: logged in as a recruiter

Current:	Find 'Profil kompanije' and after clicking on the button 'Uredi profil' - Image (logo)does not contain ALT attribute
Request:	Please add ALT attribute to the image (logo) Profil kompanije/After clicking on the button 'Uredi profil', logo appears.
Reason:	<ol style="list-style-type: none"> 1. Ensures accessibility for users with disabilities 2. Improves SEO (Search Engine Optimization) 3. Fallback content in case images fail to load 4. Facilitate maintenance and understanding of content for development and those maintaining the application

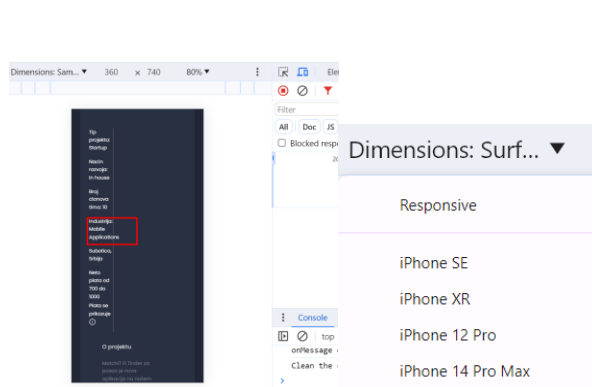

```

::before  
▼ <a class="sidebar-brand" href="https://company.matchit.rs/job-offers">  
   == $0  
  </a>
```

7) VISUAL IMPROVEMENT - Responsive design

Current:	text exceeds the boundary line on the application on devices samsung/iphone/galaxy fold/
Request:	Ensure text does not exceed the boundary line on the application.
Reason:	Visual improvement: Maintain aesthetic appeal and readability by ensuring text does not exceed designated boundaries on the application

Samsung Galaxy S8+

Samsung Galaxy S20 Ultra

8) Contact form Message

Current:	The message field currently permits the submission of a single number.
Request:	Implement a validation feature to prevent submission if the message field contains only one character (number).
Reason:	This ensures data integrity and meaningful user input.
